Video & Web Conferencing

Taking Meetings Further

Audio and Web conferencing are vital technologies to the small- and medium-sized business (SMB) markets in the U.S. These tools are seeing increased adoption based on businesses' interest in cost savings, productivity improvement, mobility telecommuting, and convenient collaborative communications. The total market for audio and Web conferencing will continue to grow at a rate of 12 percent to \$2.7 billion in 2014. Looking forward, research

shows that most small businesses plan to use audio conferencing over the next 12 months.

Share Everything Online

Share audio, high-quality video, and files via Web conference with clients, coworkers, prospects, and vendors. It's all done over the internet, so you won't have any software hassles.

Product Features

- » Supports up to 40 participants
- » Unlimited meetings
- » High-quality video conferencing
- » Integrated VOiP conferencing
- » Upload and download documents
- » Record meetings

The Smarter Approach to Collaborating Face to Face!

Enhanced Video Services

The host may broadcast and choose to allow participants to broadcast live, high-quality video from a webcam.

Meeting Recording, Editing, and Playback

Record meetings and applications for future reference, training or demos.

No Software to Download

Our Flash-based software allows for meeting participants to attend meeting from any common Web browser with no additional downloads required.

Easy Meeting Invites

Send meeting reminders and invitations via email or post the meeting URL on a website or social networking application.

Meeting Chat

Interactive chat feature allows for guests to participate in the meeting via integrated chat application.

Presentation Notes Panel

View presentation notes within a private panel while you share a presentation.

Rich Multimedia Experience

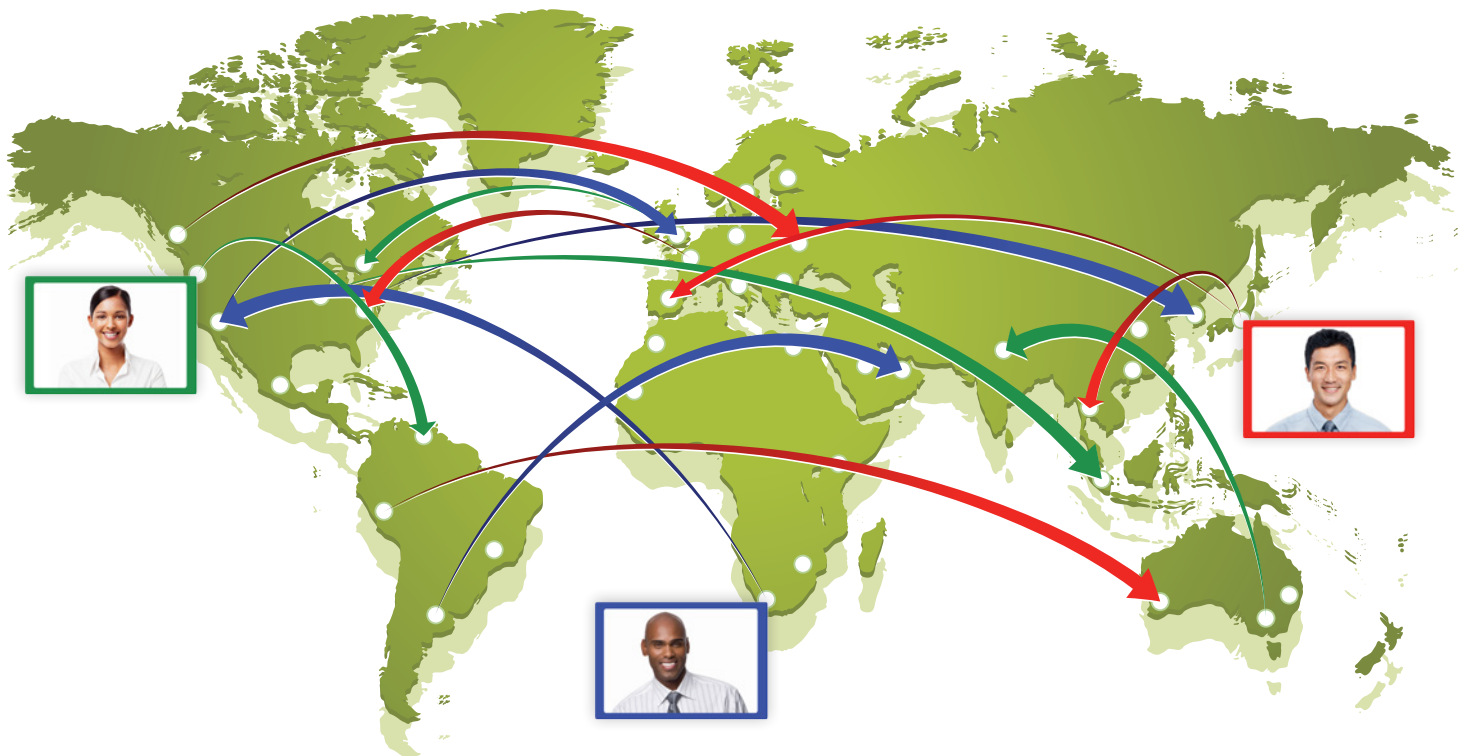

Engage your audience by incorporating multimedia in your presentations: PowerPoint,® Flash™ animations, audio, and video.

Integrated Audio

Offer a rich meeting experience with integrated VOIP audio or a traditional audio conference bridge.

Document, Application, and Desktop Sharing

Show documents, applications and your desktop to remote attendees in real-time. Pass control to attendees so they can share their desktops, or annotate yours. Collaborate on content as you annotate and enlarge documents or graphics. Switch between different sharing modes without transitions, or distractions.
